Shubham Vashisht

Frontend Developer | Data Analyst

shubhamvashishjii@gmail.com | Delhi, India | linkedin.com/in/shubham-vashisht | github.com/Vashishtjii | svashisht.tech

PROFESSIONAL SUMMARY

BCA graduate (2026) with hands-on experience in frontend and full-stack web development (React, Next.js, Node.js, MongoDB) and data analysis (Python, Pandas, Scikit-learn, Streamlit). Currently working in technical operations at TELUS International, troubleshooting technical issues and analyzing ticket data to identify recurring problems. Seeking full-time Frontend Developer and Data Analyst roles.

EXPERIENCE

Technical Support Associate (Technical Operations) — TELUS International August 2026 – Present

- Troubleshoot and diagnose software, account, and system issues using structured problem-solving to identify root causes and apply fixes.
- Log, categorize, and track issues in a ticketing system, and analyze recurring patterns to flag common failure points and improve resolution speed.
- Write and maintain technical documentation and knowledge-base style resolution steps to standardize fixes across cases.
- Escalate complex technical issues to specialist teams with clear reproduction steps, logs, and context.

EDUCATION

Institute of Information Technology and Management, Janakpuri, Delhi September 2023 – July 2026

Bachelor of Computer Applications | CGPA: 8.13

PROJECTS

Workforce Emotion & Attrition Intelligence — Data Dashboard 2026

Python, Streamlit, Scikit-learn, Pandas

- Built an interactive Streamlit dashboard that predicts employee attrition risk using a VotingClassifier ensemble on the IBM HR dataset.
- Applied KMeans clustering to segment employees, and tuned calibrated risk thresholds for clearer, more reliable risk levels.
- Designed a clean dashboard UI with a collapsible sidebar for exploring predictions and segments.

AAJ Logistics — Order Management System April 2026

Next.js, CSS Modules, Vercel | Live: aaj-logistics-order-form-iota.vercel.app | GitHub: github.com/Vashishtjii/aaj-logisticsorder-form

- Built a shipment order management system for AAJ Enterprises with a two-column layout and live preview panel.
- Implemented multi-package support with consignor/consignee details, delivery type selection, and fragile/insurance options.
- Deployed on Vercel with a dark theme and orange accents using CSS Modules for scoped styling.

AI Counsellor — Study Abroad Companion 2026

Node.js, Next.js, Full Stack

- Developed a full-stack AI-powered web app to guide students through study abroad decisions step by step.
- Features user authentication and a student dashboard with academic profiling (education level, stream, career goal, CGPA).
- Implemented progress tracking (profile completion, university shortlisting, decision locking) and next-step actions: Talk to AI, Explore Colleges, View Roadmap.

Valorant-Themed Developer Portfolio 2026 – Present

React + Vite, Tailwind CSS, Framer Motion, Netlify

- Built a custom Valorant-inspired React portfolio for a video editor/motion designer client.
- Designed reusable animated components with Framer Motion and responsive layouts with Tailwind CSS.
- Deployed to Netlify via GitHub CI/CD.

SKILLS

Frontend: React.js, Next.js, Vite, HTML5, CSS3, Tailwind CSS, CSS Modules, Framer Motion, Responsive Design
Data & Analytics: Python (Pandas, Scikit-learn), Streamlit, Data Cleaning & Analysis, Data Visualization, Machine Learning basics
Backend & Database: Node.js, Express.js (basic), MongoDB, REST API integration, CRUD operations
Languages: JavaScript (ES6+), Python, C
Tools & Platforms: Git, GitHub, Vercel, Netlify, VS Code, Postman, Figma
Core Concepts: Data Structures & Algorithms, OOP, Component-Based Architecture, Debugging, Troubleshooting & Root Cause Analysis, Technical Documentation
